

Connector Netbox Point.

The Connector Netbox Point makes it exceptionally simple to equip tables with connections. This can also be retrofitted without any problems. Prerequisite: cable outlet must be present.

Product description

Technical Details

Application:

The connector Netbox Point can be used in 2 ways:

1. To equip the media hub on the Keypiece Communication Desk with Rotary plates.
 2. As an insert at the point where the cable passes through the table tops in every conference table range.
- Available on request for desk ranges.

Description:

The connector insert point replaces the cover in the cable outlet.

Materials for the connector insert point:

Black matt plastic

Couplings:

Depending on the type, the connector is equipped on the underside with Cat 6a gender changer, VGA gender changer, HDMI and 3.5 mm stereo jack gender changer.

Cable management:

1x 3 m power cable included.

All other cables must be connected by the customer.

Installation:

The connector insert point is supplied separately and installed at the location of usage in the media hub of the Keypiece Communication Desk or in the cable outlet.
